TOUR OF THE PIC DU MIDI D' OSSAU

Northern side of Pic du Midi d'Ossau from Lac de Biouss-Artigues.

A major sporting classic in Vallée d'Ossau, Le Pic du Midi, familiarly called Jean-Pierre, is visited counterclockwise. Although it has clear trails and informative signs, the itinerary suffers from a total lack of markers in the National Park. Reserved for experienced hikers.

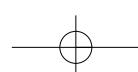

Getting to the departure point:

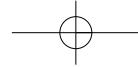

From Pau, take the N134 to the Gan exit, and then the D 934 toward Vallée d'Ossau; pass by Laruns and Eaux-Chaudes. Leave the D 934 and direction Col du Pourtalet, winding 500 m above Gabas: follow signs to Lac de Biouss-Artigues. In the summer, there is a fitted car park on the Biouss-Oumette plateau, 1 km under the lake. A foot trail (GR®10) runs all the way to the dam.

For your return: The trail loops around.

D From the Biouss-Artigues car park, behind a fence, take the wide trail that follows the right bank of the lake. Pass by a series of clearings with a horseback riding centre and then a restraining area on your right: the trail enters the wood, goes past a bridge, and climbs up to a fence. After 100 m, go past the GR® 10 that runs up to Col d'Ayous on your right ① (1549m - 707726 4747796). Follow the downhill trail that crosses the Gave de Biouss at the bottom of an immense plateau. Continue along the right bank as it meanders; right after a drop, leave the trail following a zigzag ② (1561m - 707176 4747065). Take the trail on your left that winds up through clearings. The trail, originally a cairn, leads to a rocky gorge and then to a plateau. Turn to the left of a stream until you come to a grassy drop and then go right to reach a wide trail dug in the slope. Stay on this main trail which incrementally leads to Lac de Peyreget's moraines. Go past Col de Peyreget shortcut on ③ (2194m 2h45) your left and wind your way up to Col de l'lou

(2111m - 710412 4744764). On your left, take the trail that leads to Refuge de Pombie; continue through the moraines (lingering snow banks may complicate your progress) and walk up to Col de Suzon ⑤ (2127m - 710541 4747048). Take the trail on your right that winds to the bottom of the upper Magnabait valley. Go past the drop with a lovely waterfall and on the left bank, you will come to the Col Long de Magnabait clearing: at the far end, after passing by cromlechs, go past a trail that enters the wood on your left ⑥ (1647m - 709201 4749601). On your right, take the original path: it immediately veers left under the trail and winds through the forests, intersected with another trail, to the starting car park adjoining dry toilets. (1425m - 708437 4749392).

Don't miss:

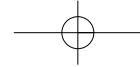

- Lac de Biou Artigues and Lac Peyreget
- Col du Soum de Pombie
- The Refuge de Pombie is nestled in the southern side of the Grand Pic, where climbing routes are the most attractive: hikers frequently observe rock-climbers here, and are surprised to hear noise from unlikely conversations and mosquitoes in this natural environment.
